Union, Federal & Green Streets Water Main Replacement

Award Date: March 2012

Value: \$ 1.0Million

General Contractor:

Harry C. Crooker & Sons, Inc.

Owner:

Brunswick & Topsham Water District
Craig Douglass, District Engineer
(207) 729-9956

Scope of Work:

Crooker was contracted for the installation of 2,500 lf of 12" Ductile Iron Water Main in a crowded, in town location. We designed and installed our own temporary water systems to serve the neighborhoods we were working in. Trenches were ground/reclaimed in advance of the watermain installation so that the material could be reused onsite as gravel, eliminating the need for import of processed gravel. The project was negotiated with the water district due to our past experiences and projects with them, our methods, equipment and quality of work.
